-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement filed August 26, 2004 has been considered. The European Search report has been considered, but was deleted from the IDS as it is not a proper listing.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 92/00465.

Re claims 1-11, WO 92/00465 discloses a disc brake pad backplate assembly comprising: a backplate (1) including circumferentially spaced abutments (17) separated by a distance, a pad spring (15) including end portions (29) and a central portion between the end portions, wherein the circumferentially spaced abutments of the backplate restrain lateral movement of the end portions of the pad spring; and a retaining feature (19) to mount the pad spring to the backplate, wherein at least one of the backplate and the pad spring includes the retaining feature, wherein the pad spring is dimensioned relative to the distance between the circumferentially spaced abutments such that a radially inward loading applied at the central portion of the pad spring

Art Unit: 3683

causes the pad spring to function in a first resilient leaf spring-like mode where the end portions of the pad spring are unrestrained up to a predetermined load limit, and wherein above the predetermined load limit the end portions of the pad spring are restrained by the circumferentially spaced abutments of the backplate and the pad spring functions in a second buckling mode, and wherein a spring rate of the pad spring in the first mode is lower than the spring rate of the pad spring in the second mode.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

EP 0694707, Kay et al. and Goddard et al. teach disc brake pad backplate assemblies.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (703)305-0293. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on (703)308-3421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
